

Job Description

Tejse Online Services Pvt. Ltd. is seeking to make a positive, lasting impact on animal health care, our community, and the field of veterinary medicine. Our veterinarians/ AI Technicians come from diverse backgrounds and experiences, which we believe helps us deliver high-quality, comprehensive care to the community we serve. We're currently searching for a bright, high-energy person to join our practice, and help us make our services more complete. This individual should be a natural hard worker and show a willingness to pitch in and support our other veterinarians in performing their work.

Objectives of this Role

- Devote experience, knowledge, skills, and energy to the treatment of sick and injured animals.
- Serve as a primary source of information on animal care for owners and care providers in our community
- Continue to learn and understand the latest veterinary practices
- Support your clinic's other doctors in their diagnoses and surgical procedures

Daily and Monthly Responsibilities

- Perform regular and preventive health examinations on small animals and house pets.
- Execute Artificial Insemination/Pregnancy Diagnosis at hospitals/farms/other sites to facilitate the community and to improve the breed.
- Collect body tissue, feces, blood, urine, or other body fluids and biological specimens of the animals for examination and analysis.
- Advise animal owners regarding sanitary measures, feeding, general care, medical conditions, or treatment options.
- Assess animals to determine the nature of disease or injury
- Coordinate and implement treatment plans with animals, and provide detailed explanations for the client and medical records
- Manage emergency medical situations that could arise in a general practice— assess, stabilize, and determine if a referral is appropriate or patient can be managed in-house
- Provide clients with estimates for all procedures and ensure that charges are communicated effectively
